

# Flexible ISO 29001 Compliance Software

The petroleum industry has undergone tremendous change over the past decade. There has been a wave of consolidations and mergers in an attempt to gain greater efficiency and market share. Not surprising, many companies now provide both products and services to the oil and gas sector.

In order to remain competitive, service providers in the oil and gas industry need high-tech tools that will help them connect multiple, diverse locations in real-time communication.

## ► SOLUTION OVERVIEW

At Accupoint, we combine best business practices with cutting-edge cloud technology to deliver an integrated quality management software solution for the oil and gas industry. The Acurx ISO 29001 oil and gas software makes it easy to manage complex ISO compliance requirements in a fast-moving environment.

Acurx is the only web-based oilfield QMS system on the market today that has been specifically designed to administrate the requirements of ISO 29001. With customizable reports, intuitive interface, and reliable metrics analysis, Acurx brings modern-day analytics to the oil & gas sector.

The result for your company is improved customer satisfaction, increased operational awareness and an enhanced bottom line.

## THE ACURX ADVANTAGE

Maintaining an effective QMS is a headache for any company, particularly those working internationally, as regulations not only change over time but also vary from region to region. The considerable resources required often bring productivity to a crawl, and it can be a source of much frustration.

By using Acurx, oilfield organizations are embracing the most agile compliance management system on the market today. Product and service quality will be effectively managed, customer requirements will be met, and productivity will improve dramatically as inefficiencies are rooted out and eliminated from the value chain.

Acurx relieves multiple pain points by providing sensible, efficient, and easy-to-use software to manage ISO 29001 compliance requirements.

## ► SOLUTION BENEFITS

The Acurx platform gives you the ability to guarantee customer compliance, regardless of size or geographic location. But the real benefits go much further. By using Acurx to establish your organization's commitment to quality management, you will:

- Improve productivity and efficiency
- Increase customer focus and responsiveness
- Enhance quality visibility across the value chain
- Reduce performance reporting costs in operations
- Mitigate risks associated with process operations
- Ensure adherence to industry & customer requirements
- Positively impact company profitability
