

ACURX INTEGRATED ISO 29001 MANAGEMENT

COMPREHENSIVE 29001 QUALITY COMPLIANCE

Today's demand for quality management systems requires service providers to take a new look at compliance. The constant shifts in an ever-evolving marketplace coupled with the need to ensure compliance and reduce risk across multiple geographical locations can no longer be managed using traditional software or manual templates alone. In order to remain competitive, service providers in the oil and gas industry need high-tech tools that will help them connect multiple and diverse locations in real-time communication.

The Acurx QMS management platform is the only cloud-based quality solution on the market today that was specifically designed to control and administrate ISO/TS 29001 requirements. With 86 integrated modules and more than 120 pre-defined reports, users can effectively control and manage all ISO components using one secure and straightforward application.

INTEGRATED ISO 29001 MODULES INCLUDED:

- Asset Management
- Contract Review
- Quality Planning
