OpLink

Enterprise QHSE Software for Industry

Regardless of the field that your company specializes in, compliance is a colossal undertaking. Keeping up with evolving ISO standards requires dedication, attention to detail and resource investment. For many enterprises, these tasks represent untenable obligations that may actually hinder efficiency.

That's why we've created pliable platform that adapts to your needs and requirements without losing sight of the stringent standards of international compliance guidelines.

▶ SOLUTION OVERVIEW

The OpLink solution brings together time-proven capabilities in a new way for today's global, collaborative work environment. The result is a solution that provides the core functionality in a way that's easy, lean, and agile for today's global business environment.

The platform is designed to deliver increased effectiveness, collaboration and operational efficiency in the administration of yourISO based Quality, Environmental and Safety compliance programs.

The platform contains over 64 integrated modules and 120 built-in reports that allow users to control the ISO requirements from a secure and easy-to-use application.

✔ QUALITY MANAGEMENT

The OpLink platform is the easy to use, web-based solution designed to administer ISO 9001:2015 Quality Management programs. OpLink streamlines the many disconnected, often manual systems and business processes used to meet today's complex global operating standards and regulations.

🌿 ENVIRONMENTAL MANAGEMENT

The OpLink platform easily tracks, stores, and analyzes information to manage all aspects of your 14001 environmental program. Our system is built to achieve and maintain compliance status and increase accountability for environmental performance.

➕ SAFETY MANAGEMENT

The OpLink platform manages everything from incidents and safety audits to safety meetings. Our easy to use solution provides a web-based system to store and access safety related information, enabling risk reduction for your employees, customers and business.

ACCUPOINT©

SOLUTION BENEFITS

OpLink's simple user interface, powerful backend analysis tools and anytime access to data ensure multi-level organizational involvement in the compliance management system. In addition, OpLink's comprehensive toolset helps save staff time in data acquisition and analysis, while ensuring that compliance metrics are managed and monitored consistently.

The OpLink platform deploys uniformly across diverse organizational structures, computers, and mobile devices. As a result, it's possible to monitor your compliance efforts with increased impartiality.

> Delivering Verifiable Performance Results To The Manufacturing Sector

SUPPORT SERVICES

Technical Services

Our Web Support team can provide a wide range of application support services including implementation consulting, data import and custom programming.

Application Support

Accupoint Software maintains telephone and email based help desks, as well as an online self help knowledge portal.

Platform Security

All of your records and related information are secured with daily back-ups, point to point encryption and additional physical security protocols.
