

OpX[®]

QUALITY MANAGEMENT SOLUTIONS FOR THE PETROLEUM INDUSTRY

Integrated Quality Management

OpX™ is an integrated ISO | API compliance management system that provides the oil & gas industry with a dedicated solution for maintaining multiple compliance standards simultaneously.

With a simple user interface, flexible tools, and on-demand access, OpX™ represents the best of a modern approach to decision-making and delivers for teams that value productivity and efficiency.

Accupoint's flexible, web-based solutions provides a toolkit to save staff time in data acquisition and analysis, while ensuring that compliance metrics are managed and monitored consistently.

Maintaining multiple systems is a headache for any company, particularly those working internationally, as regulations not only change over time but also vary from region to region. The considerable resources required to maintain these standards often brings productivity to a crawl, and it can be a source of much frustration.

OpX™ relieves this pain point for employers by providing sensible, efficient, and most importantly easy-to-use software to manage multiple compliance requirements.

OpX Modules

- Project & Task Management
- Product Management
- Training & Curriculum Management
- Supply Chain Controls
- Design Review & Validation

What OpX Can Do for You

The OpX™ platform gives you the ability to guarantee customer compliance, regardless of size or geographic location. But the real benefits go much further. By using OpX™ to establish your organization's commitment to quality management, you will:

- ✓ Improve productivity and efficiency
- ✓ Increase customer focus and responsiveness
- ✓ Enhance quality visibility across the value chain
- ✓ Reduce performance reporting costs in operations
- ✓ Mitigate risks associated with process operations
- ✓ Ensure adherence to industry & customer requirements
- ✓ Impact company profitability

The OpX Advantage

By using OpX™, oilfield service organizations are embracing the most agile compliance management system on the market today. Product and service quality will be effectively managed, customer requirements will be met, and productivity will improve dramatically as inefficiencies are rooted out and eliminated from the value chain.

With customizable reports, a flexible and scalable platform, an intuitive interface, and reliable metrics analysis, OpX™ brings modern-day analytics to an industry that can benefit enormously from them.

At Accupoint, we merge industry best business practice with innovative cloud technology to deliver superior oilfield quality assurance. Call us today for more information or to schedule a platform demonstration with one of our solution consultants.

The OpX platform offers additional benefits, including:

- Agile builds allowing for easy customization
- Reduced implementation time measured in days, rather than weeks or months
- Real-time reporting from the point of operations
- Scalable technology, allowing you to grow without incurring additional costs

About Us

Accupoint Software is a global provider of innovative API compliance management solutions. Our comprehensive solutions help oil and gas service suppliers not only maintain their API compliance programs, but transform their disconnected compliance information into knowledge that impacts the bottom line.

Founded by a group of operations and IT professionals, Accupoint Software is committed to helping oil and gas firms reduce the amount of non-value added time and effort spent managing the overlapping systems required to comply with global business standards and customer requirements.
